

Your challenges our solutions

**A Complete System
Solution Provider**

My Story

**Your challenges
our solutions**

The words from Radko Luzar, CEO

"For years the L-Tek's strong and steady growth has been based on new products and developed solutions made by our highly experienced and qualified team.

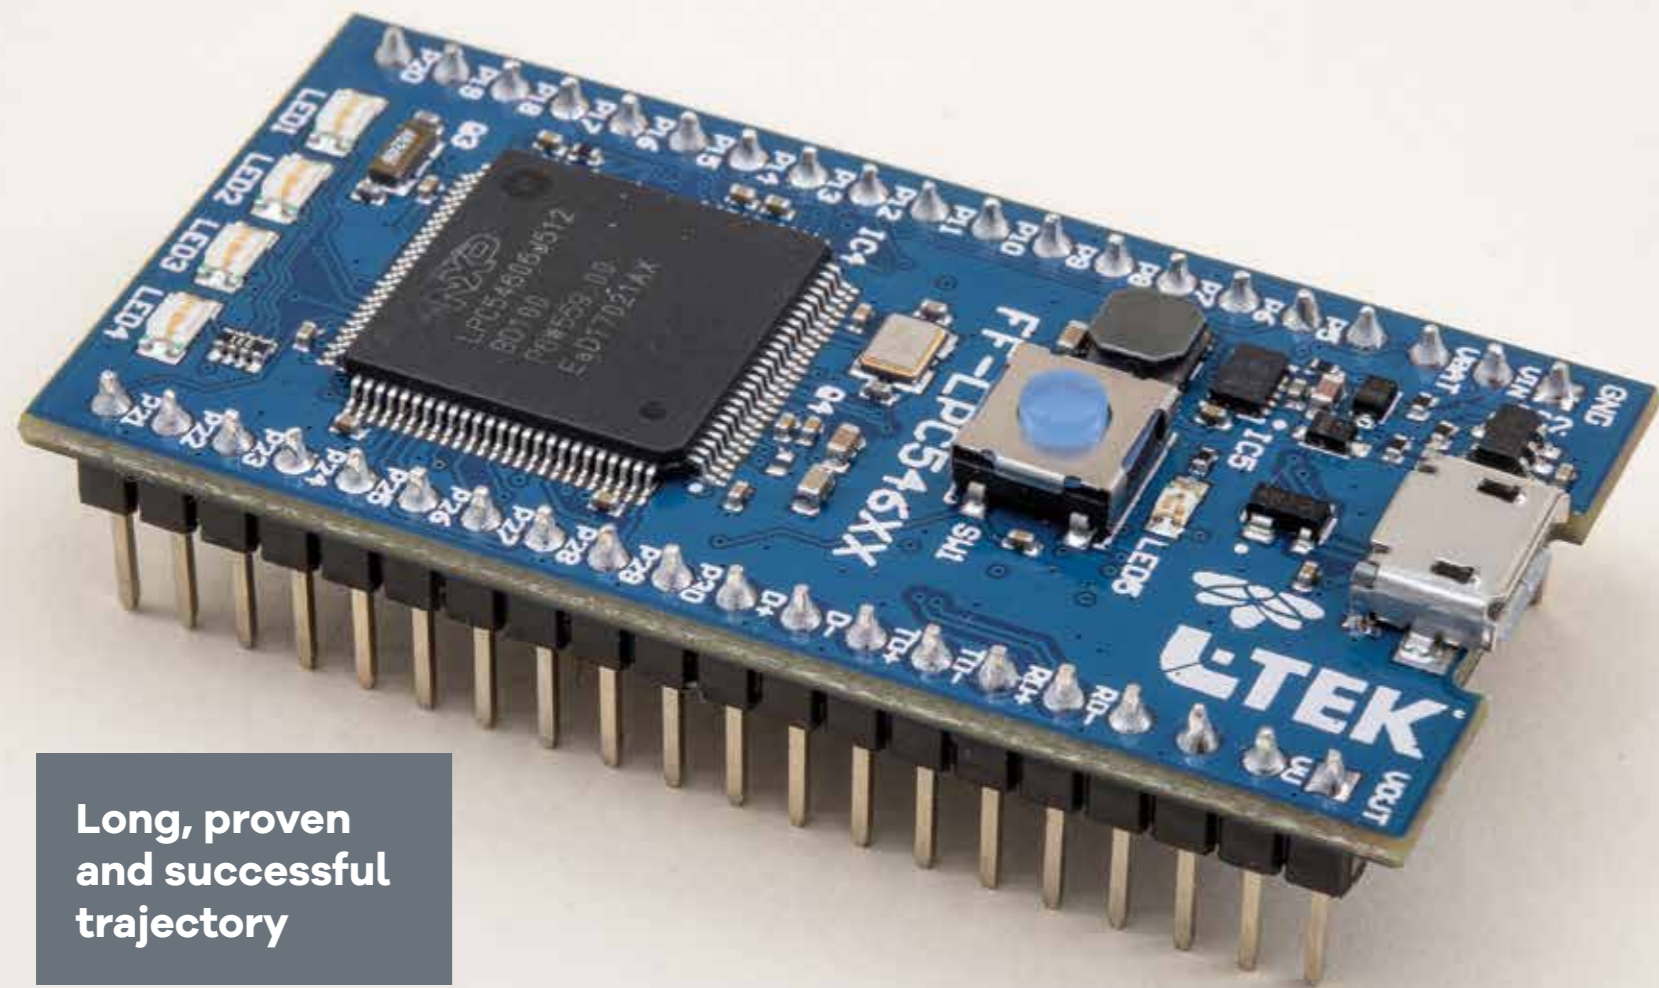

I strive everyday towards a continuous focus and growth based on customer needs and desired solutions.

I will ensure that L-Tek provides you, our partners, with a complete turn-key solution from idea generation, through design and prototyping to final manufacturing in any area of IoT or Medical for both software and hardware solutions. Relying on our company values and professional technical team, I can assure you we are able to deliver on our promises.

Therefore, we stand behind our slogan:
Your challenges our solutions"

About our Company

Long, proven
and successful
trajectory

L-Tek is a family-owned company founded in 1994 in Šentjernej, Slovenia, by Radko Luzar. Since its establishment, L-Tek has earned a reputation as a technical innovator specialised in and focused on the research, development (R&D) and Electronics manufacturing services (EMS) and software solutions.

Our solutions can be applied to a variety of industries engaged in the small to medium scale production of complex, high-tech products.

We have capabilities that allow us to design optimised, top-notch solutions for each specific customer.

Today, L-Tek looks back upon a proven, long and successful trajectory as a true solution provider, and is recognised as such by a plethora of well-known international companies and partners.

A successful track record

- 1994 L-Tek is established by Radko Luzar in Šentjernej, Slovenia
- 1995 Cooperation with KEIL Elektronik GmbH is initiated
- 1996 Partnerships with DAU GmbH and EBG GmbH are initiated
- 2005 An R&D partnership is established with ARM
- 2009 A partnership is initiated with Dewesoft
- 2015 L-Tek becomes an armMBED ecosystem partner
- 2015 We establish an IBM business partnership
- 2016 L-Tek IoT department commences activities and launches the first state-of-the-art IoT solutions
- 2016 L-Tek launches Trimmer Capacitors production
- 2016 L-Tek becomes arm University partner
- 2016 First EN ISO 13485:2003 certification
- 2017 L-Tek received golden award for unique L-Tek IoT Platform
- 2018 Successful transition to EN ISO 9001:2015 and EN ISO 13485:2016 standard

2020

New business
solutions in new
industries to further
optimize and increase
customer benefits

Our company values and social responsibility

L-Tek is committed to lofty corporate values such as flexibility, teamwork and a fast response time and the eagerness to offer and supply the best solutions and superior-quality products and services, continuously innovate and amass further technical knowledge and expertise. These are at the heart of our company and are our lifeblood: they drive everything we do every single day.

Corporate social responsibility is integral part of L-Tek strategy. L-Tek has been a very proud sponsor of our great Slovenian athletic team for some years.

“We are eager to support our young talents in their quest to achieve outstanding international results and get our country recognized world-wide! This is part of our culture and responsibility as a company and as a human being.” said the owner and CEO Radko Luzar.

Passionate Team

We are recognised as a very flexible partner with a highly motivated team focused on delivering a great customer experience at any stage of our collaboration.

We are passionate about what we do

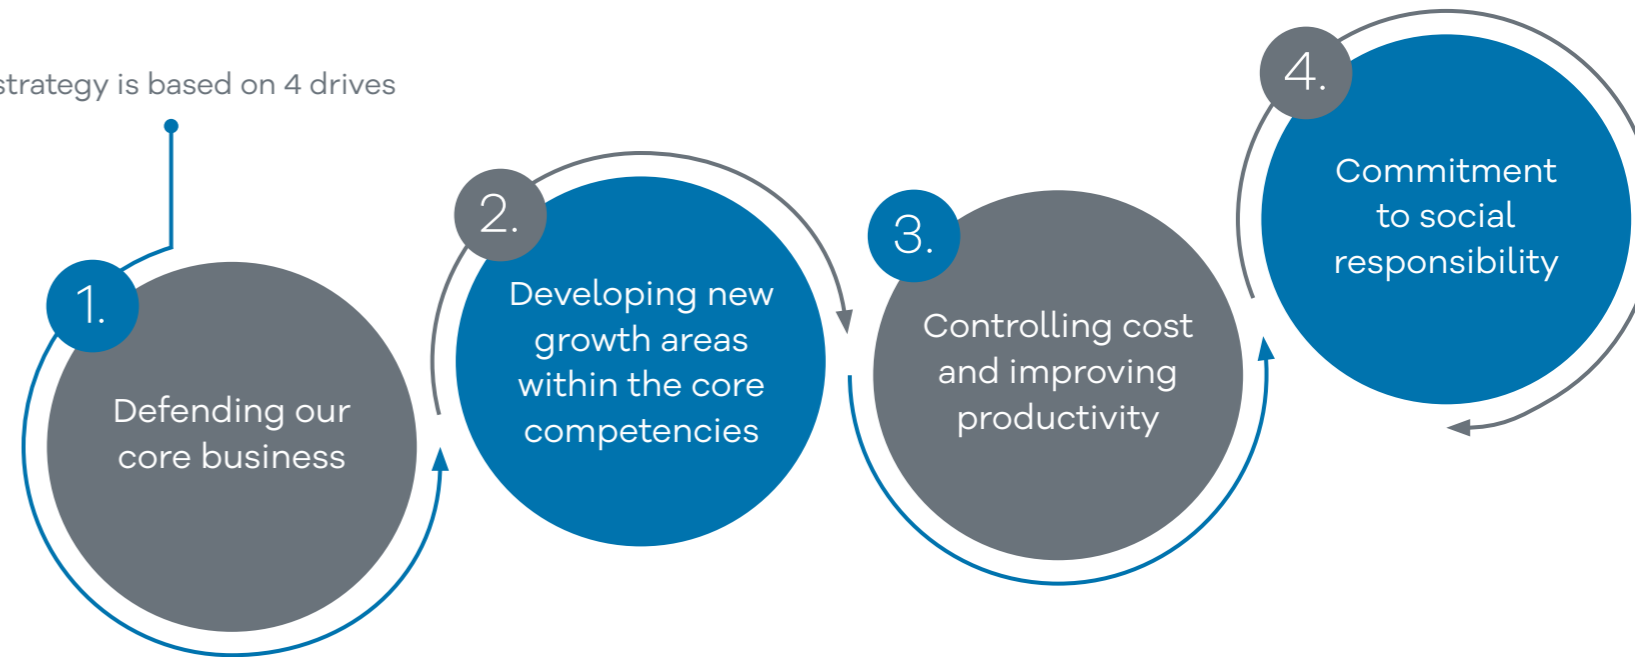

**A proven strategy
for profitable and
sustainable growth**

A proven strategy for profitable and sustainable growth

L-Tek is a modern, high-performing and financially secure company.

Many decades of intense work brought L-Tek into an international mid-size company, which confirms L-Tek's status as a healthy company focused on the future.

Our strategy is based on 4 drives

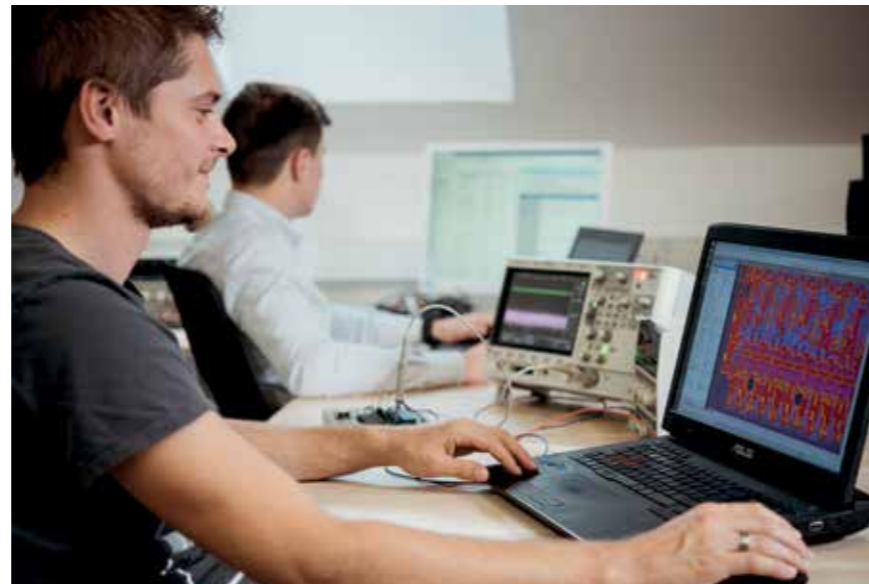

What we do

L-Tek specialises in designing, development and production of high tech electronic products in quantities from prototypes to small and medium scale series. All phases of product production are included in our offer: electrical design, software development, manufacturing services (EMS), assembly, testing, dispatch and repair services either for general electronics, IoT or Medical segments.

All processes are carried out in an ESD-protected environment and in accordance with IEC EN 61340 regulations, EN ISO 9001:2015 and, when needed, EN ISO 13485:2016 medical device standards.

**We design,
develop
and produce**

L-Tek® IoT

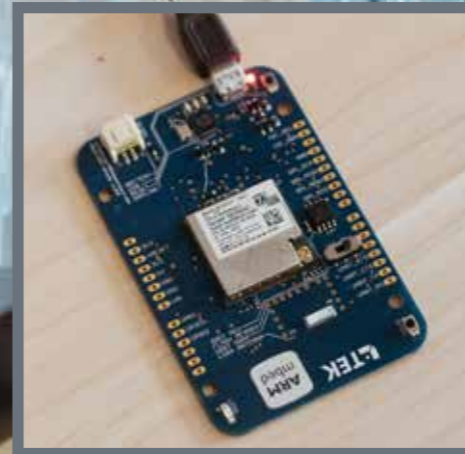

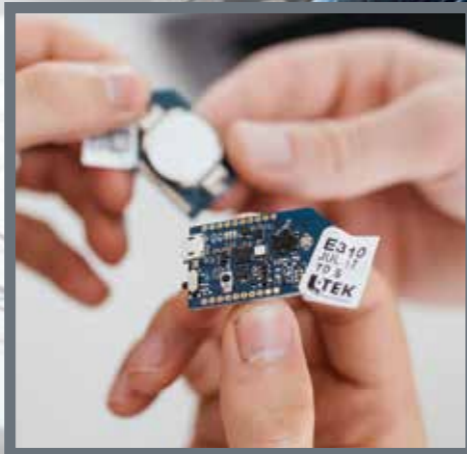

L-Tek IoT is a family of open-source development boards that make it easy to implement custom IoT applications with support for a range of connectivity protocols.

The L-Tek IoT brand represents a family of state-of-the-art SMART IoT products that offer today's leading measuring, monitoring and control solutions. All products can be modified and optimised for different situations, so they're fully customizable!

With focus on IoT and Industry 4.0 we already have prepared building blocks of smart IoT devices that can communicate over various seamless protocols. Thus enabling a quick prototype - proof of concept solution.

Our research and development group provides whole service of custom design and prototype for cost effective and quick to market products.

Create your very own IoT world with the L-Tek IoT platform!

L-Tek® Medical

In the medical industry, the continuous development and upgrade of the product is mandatory. L-Tek is able to lead research and development projects in the area of medical electronic solutions.

With our experienced team, L-Tek is able to design and develop a mechanic and electronic solution for a specific medical industry. L-Tek is able to produce prototypes in a flexible time schedule and by its optimal production set-up manages to produce small and mid-size series at a very competitive price under the required medical ISO standard.

L-Tek design and produce medical products under EN ISO 13485:2016, ISO 14791, ISO 62304, ISO 10933.

L-Tek® Manufacturing

L-Tek is specialised in providing Electronics manufacturing services (EMS) for many high-tech customer all over the world.

With focus on providing a service of production from prototypes to small and medium-scale batch quantities.

Electronics manufacturing services (EMS):

- ESD controlled production area
- Complete production traceability
- SMD and THT assembling
- In-Line SPI and AOI
- Reflow and Vapor phase soldering
- On-board flashing and testing
- Box build assembly
- Custom Packaging design

Completely
automated
production
series

L-Tek® Products

L-Tek keeps developing and innovating, offering a wide range of products and services that help our customers and clients achieve their ambitions. Beside our standard product range we can design and develop a product that will accomplish your ambitions!

Make use of the benefits of a complete service and business support from L-Tek!

L-Tek® Quality

We are EN ISO 9001:2015 and EN ISO 13485:2016 certified.

We ensure that our employees are always up-to-date with the newest technology. We regularly attend seminars, IPC certifications and learn new skills, thus improving the quality of the services we provide to our customers.

Quality is
our priority

**We are focused
on our customers.**
